

How dare you try to take something away that we as people enjoy listening. As it is already the government has control over America because of the 911 incident and now to take away the music that we love is ridiculous. I pay my monthly charges to enjoy GOOD music and programming and just because it is effecting the other radio stations o-well, suffer, the content and the shows are not even worth listening anyways. I am sure like other people, if this is taken away, we will just go back to listening to our CD's and your stations will still be just there taking up space. The last time I looked, this is a "FREE" country so to speak and as long as I am willing to pay my monthly service charges YOU have no right to take it away just because YOU are bothered.
